DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on September 30, 2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent granted on Application Number 10/701,837 (Stamm) has been reviewed and is accepted. The terminal disclaimer has been recorded.

Response to Arguments

The indicated allowability of claims 6 to 15 is withdrawn in view of the newly discovered reference(s) to U.S. Patent No. 6,610,419 B1 (Stamm). Rejections based on the newly cited reference(s) follow.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 6 to 15 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 to 5, 7, and 10 to 12 of U.S. Patent No. 6,610,419 B1 (Stamm). Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims are directed to a protective layer for a component

Art Unit: 1775

substrate wherein the protective layer consists essentially of an alloy based on nickel-cobalt-iron-chromium-aluminum-yttrium with additions of rhenium, and both sets of claims contain overlapping alloy elemental ranges. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have selected the overlapping portions of the alloy elemental ranges taught by Stamm and arrive at the protective layer alloy compositions as claimed by the applicant. The Examiner notes that the Stamm patent claims require the presence of an outer MCrAlY alloy layer that is predominantly in the γ -phase. Also, the MCrAlY alloy layers claimed by the applicant are expected to be very thin (on the order of microns).

Allowable Subject Matter

Claims 16 to 19 are allowed.
